Global institutional financial data spend — without relationship intelligence	*Alternative data market growth rate — faster of any segment*	*Bloomberg Terminal seat price — still no graph intelligence included*	*Commercial systems combining dynamic graph analytics + neural RGNN + AI-native*

MARKET LANDSCAPE — SIZE & SEGMENTS

The financial data and analytics market spans multiple overlapping segments. MKG operates at the intersection of three of them: the traditional financial data infrastructure (Bloomberg, Factset), the AI market intelligence layer (Alphasense, RavenPack), and the fast-growing knowledge graph technology vertical. Each segment is large, each is growing, and **none has solved the problem MKG addresses.**

The alternative data market — the segment most relevant to MKG's signal output — is **the fastest-growing segment in financial services.** From $14.5B in 2024, it is projected to reach $73B by 2030 at a 63% CAGR, driven almost entirely by hedge funds seeking alpha signals that traditional data cannot provide. Hedge fund operators account for 58–76% of all alternative data spending.

> ***"More than 60% of buy-side respondents currently use alternative data; 54% use it extensively. The average large fund subscribes to 45 separate datasets, spending $1.6M per year."***

The knowledge graph market itself — MKG's core architectural technology — is growing at 35% CAGR, and financial services (BFSI) is already its largest vertical. **By 2025, 60% of financial institutions are expected to adopt graph analytics as their core fraud detection technology**—a *general* point that the graph paradigm has institutional legitimacy, even if no one has yet applied it to alpha generation with neural-network-adjusted weights.

MARKET: GLOBAL FINANCIAL DATA
$35B
+ 5% CAGR
Bloomberg, Refinitiv, Factset, Dealis incumbents, this ground, zero relationship intelligence.

MARKET: ALTERNATIVE DATA
$11.65B
→ $73B CAGR · 63.5% by 2030
Fastest-growing segment. Hedge funds dominate 58% of spend. Pure-play competitors thin.

MARKET: KNOWLEDGE GRAPH
~$8B
→ 35% CAGR
Neo4j/Graphwise$1.4M, AstraDeck, Dynamo$1.4M, ontoIT, Ontotext.

MARKET: FINANCIAL SERVICES
$11B
→ 17% CAGR · $8.5B by 2030
MKG's core architectural technology. BFSI is largest vertical. Present tense for financial institutions.

MARKET: GRAPH RISK MGMT
$4.5B
→ 20.5% CAGR · $9.3B by 2030
Fraudbot, Anyone.Ai$1.4M industrial. Transactions, logistics chains graph. Close for operations, not investing.

MARKET: ADVERTISING & MARKETING
$15B+
→ Infrastructure of all first above
Relationship intelligence for alpha generation. Currently monetized by one commercial system.
